

POWER DELIVERY SERVICES GROUP SETS DATES FOR 2004 TRANSMISSION LINE AND SUBSTATION ENGINEERING COURSES

January 27, 2004 - The Sargent & Lundy Power Delivery Services group has set the dates for its highly regarded Transmission Line and Substation Engineering courses. Sargent & Lundy's senior engineers have conducted the courses since 1994 for engineers and designers from domestic and international electric power companies. Attendees obtain 1 Continuing Education Unit (CEU) for every 10 hours of classroom instruction and a Certificate of Completion. In addition, the courses are also available to utilities at their offices.

The 4-day courses provide practical, project-oriented training for both entry-level engineers and the experienced engineer new to the design, specification, and installation of transmission and substation facilities. To date, more than 600 industry professionals from 100 companies have participated.

The 2004 course dates in Chicago are:

Substation Engineering Course	Transmission Line Engineering Course
June 7-10, 2004	June 14-17, 2004
September 13-16, 2004	December 13-16, 2004
December 6-9, 2004	

Detailed information on the course sessions is at <http://www.sargentlundy.com/power/course.asp> along with registration forms and fee information. Or, contact Mary Jo McNamara at 312-269-2117, mary.j.mcnamara@sargentlundy.com

Sargent & Lundy LLC is a worldwide leader in professional services for the electric power industry and has been dedicated exclusively to serving electric power clients for 113 years. The firm provides comprehensive engineering, energy business consulting, and project services for new and operating fossil-fuel and nuclear power plants and power delivery systems.
