

For more than a century, clients have turned to Sargent & Lundy for reliable power generation project management, engineering, procurement, and design services.

From designing the first condensing unit used for power generation to web-based, real-time interactive 3-D model walkthroughs, Sargent & Lundy is in the forefront of the complex marketplace of power generation design

**Sargent & Lundy** LLC

## **NEW GENERATION EXPERTISE**

Sargent & Lundy is providing new coal power plant services ranging from technology assessment, site selection, permitting, conceptual and/or full scope design in a variety of contracting configurations for many ongoing PC, CFB, IGCC, and solid fuel re-powering power plant projects. Our clients count on our extensive experience and exclusive commitment to power - again and again - for cost-effective, leading edge power services.

## **ENVIRONMENTAL COMPLIANCE**

Sargent & Lundy is the power industry leader in SCR and FGD retrofit applications designed in the past 10 years. Our expert teams consistently deliver innovative, cost-effective environmental control solutions tailored to the unique needs of each application. Our staff has expert knowledge of SO<sub>2</sub>, NO<sub>x</sub>, particulate, and mercury control processes and the continuing evaluation of their application.

Satisfied, long-term Sargent & Lundy clients range from rural co-operatives to independent investors. The common thread? High quality, responsive solutions provided by the best engineering talent in the industry... what can we do for you?
